MEMORANDUM FOR THE RECORD

25X1A

FROM: 
Office of General Counsel

SUBJECT: Discussions Between FBI and CIA Representatives Concerning
Establishment of a FBI Senior Officer Seminar Program

25X1A

1. On 30 November 1976 Mr.  OTR, contacted the undersigned inquiring whether or not there would be any problem in engaging in subject activity. The scope of the activity will involve one FBI employee from its training organization meeting with Agency representatives who sponsor the Agency's Senior Seminar Program. Discussions will primarily focus on mechanical aspects of the development, presentation and monitoring of the Program. Substantive courses will be discussed only to the extent of providing examples of the level and type of information presented to participants in the course. OTR contemplates that they may provide the FBI representative with copies of unclassified samples, schedules or other materials. The Agency will not be involved in designing the FBI course or the manner of its implementation, nor will the FBI representative be attending the CIA Senior Seminar.

25X1A

2. After an examination of the pertinent provisions of Executive Order 11905 and HR  the undersigned concluded that the activity in question was not proscribed by either of these authorities. However, under the provisions of HR  it might be appropriate that the Deputy Director or head of the independent office responsible be advised of the arrangements in question, though the activity in question would, in the undersigned's opinion, be considered support or cooperation in only the very broadest sense.
